

Take a Bite Out of Corrosion!

Barracuda™ Lubricant

Triple Action Lubricant

Description

Barracuda™ Triple Action Lubricant is a breakthrough multi-use product intended for shop or factory applications. Its proprietary formulation delivers superior “bolt-busting” penetrating performance on seized fasteners while also providing excellent cleaning and protection for metal surfaces.

Applications

- Loosens frozen pipe joints, nuts, bolts, screws, clamps, etc.
- Lubricates hinges, slide mechanisms, bearings, gauges, etc.
- Stamps and blanks, light to medium gauge aluminum or steel.
- Rustproofs machine tables, bushings, machine/hand tools, gun barrels, farm implements, and any area susceptible to corrosion or high humidity.
- Displaces moisture from motors, pumps, wires, and switches.
- Cleans off rust and light oils from machine beds, chucks, ways, gears, threaded holes, and internal machine parts.

Typical Properties

Property	Results
<i>Appearance</i>	Clear amber liquid
<i>Specific Gravity</i>	0.86 @ 77 °F
<i>Bulk Density</i>	7.17 lbs/gallon
<i>Odor</i>	Mild sweet/citrus

Performance Features and Benefits

- Penetrates rust quicker and more effectively than other consumer products freeing up time to fix what needs to be fixed.
- Quickly removes grease, grime, and rust without harsh solvents or overpowering odors characteristic to other commercially available products.
- Water-displacement property allows moisture to be wicked away from the metal surface while laying down an imperceptible protective film.

Directions for Use

Barracuda™ Triple Action Lubricant can be used via aerosol spray, painting, misting, etc. Because there are so many applications in which Barracuda Lubricant can be used, the directions for usage will vary greatly. Please consult with your JTM Products, Inc. representative if you have further questions.

Consult product SDS for complete product safety information.
